Hello,

I'm Sunkari Rama Harshini

3rd year Student at IITH

Hi, I'm Sunkari Rama Harshini, a B.Tech student in Artificial Intelligence at IIT Hyderabad. I'm passionate about machine learning, and technology related to this. Currently, I serve as a Hostel Representative, where I've gained valuable leadership and teamwork experience.

Education

1

2

3

4

5

6

7

2023 - 2027

Indian Institute of Technology, Hyderabad
Bachelor of Technology in Artificial Intelligence

Currently pursuing B.Tech in Artificial Intelligence with coursework in Machine Learning, Data Structures, Algorithms, Probability, and Convex Optimization. Focused on developing strong analytical and programming skills through practical projects and research-oriented learning.

2021 - 2023

Sasi Educational Institution, Vizag

Completed Intermediate (XII) with 93.8%. Built a solid foundation in Mathematics, Physics and chemistry.

2019 - 2021

Sri Chaitanya School

Completed Secondary Education (X) with 99.5%. Achieved excellence in academics.

7

MNIST Data Classification

Developed and implemented multiple machine learning models for handwritten digit recognition using the ***MNIST dataset***.

Experimented with ***K-Nearest Neighbors (KNN)***, Perceptron, Logistic Regression, and Neural Networks to compare model performance.

Explored ***various activation functions, regularization techniques, and optimizers*** to enhance model accuracy and generalization.

The project strengthened my understanding of ***supervised learning, optimization, and model evaluation***.

Project 2

Applied Statistics (Team Project)

Performed comprehensive data visualization and statistical analysis on real-world datasets.

Used **bar plots, pie charts, histograms, Ogive curves, and boxplots** to represent and interpret maritime operations data.

Applied the **Central Limit Theorem** to approximate sample mean distributions and conducted inferential statistics to compare population means.

Executed hypothesis testing on Bernoulli-distributed bank loan data to evaluate approval likelihood.

This project enhanced my understanding of **data visualization, statistical inference**, and teamwork in analytical problem-solving.

Project 3

7

Grocery Management System (Team Project)

Designed and developed a ***full-stack E-commerce web application*** for managing groceries with dedicated interfaces for customers and sellers.

Implemented backend logic using ***Django*** and ***MySQL***, applying concepts such as Functional Dependencies, Triggers, and Stored Procedures for efficient data management.

The project focused on creating a smooth user experience while ensuring data integrity and system scalability.

This experience strengthened my skills in ***web development, database management, and collaborative project*** execution.

Project 4

7

Linear Regression on E-Commerce Data

Developed a ***Linear Regression model*** to predict the Yearly Amount Spent by customers based on features like ***Average Session Length, Time on App, Time on Website, and Length of Membership***.

Performed data cleaning, feature selection, and model evaluation to determine the factors influencing customer spending.

The project improved my understanding of ***predictive modeling, regression analysis, and data-driven decision-making***.
